

MAEOE

Maryland Association for Environmental
& Outdoor Education

2015/16 Maryland Green School Application Guide: *Building Sustainable Schools in Maryland*

The Maryland Green School award program allows a school to demonstrate that by integrating hands-on, inquiry-based instruction, youth are empowered to apply knowledge practically. At school, home, and in their communities, students are reducing pollution, decreasing waste, increasing habitat, limiting carbon emissions, as well as creating healthy learning and living environments. The program is designed to highlight achievements and progress that schools are making with the Maryland Environmental Literacy requirement as set forth in [COMAR 13A.04.17.01](#). The program structure also highlights the actions that schools are taking to build a sustainable future.

By providing Environmental Education, Maryland teachers and partners enable students to make decisions and take action that creates and maintains a relationship between themselves and the environment. Maryland's students, teachers, families, and those who work at the schools are all involved in the preservation and protection of the state's unique natural resources, particularly those of the Chesapeake Bay and its watershed. [Find more information about the Environmental Literacy Standards here.](#)

Keep in mind that multiple parts of your application can connect with Maryland College and Career Ready Standards including:

- NGSS (Next Generation Science Standards) curriculum
- C3 curriculum
- STEAM curriculum (Science Technology Engineering Arts and Math)
- Pressing environmental issues including climate change, decreasing biodiversity, nitrogen cycle, aquifer depletion, endangered species, habitat loss and other issues

Throughout the application, you will find examples that show some of these connections

Getting Started on the Maryland Green Schools application for NEW and RECERTIFYING GREEN SCHOOLS:

*****If you are considering becoming a Maryland Green Schools for the first time look at these [resources](#).*****

1. Contact your Green Center or Green Leader. Your Green Center or Green Leader can provide assistance with the application process. See MAEOE's website for a list of Green Centers in your area: www.maeoe.org. Please note: even if you are recertifying, MAEOE strongly recommends that you speak with a Green Center or Green Leader at least once during your process. There is a high correlation between schools reach out to a Green Leader or Green Center and achieve a successful result.
2. Establish your school's green baseline by making a list of all green activities from the past two years, including photos. This will help you put your application together.
 - If this is your first certification, you will need information and documentation from this school year and the previous school year (2014-2016).

- If this is a recertification, you may include information and documentation from this school year and any of the previous three school years (2012-2016).
3. Set up an electronic application to log your school's green information and documentation. Applications can be in the form of a website, Weebly, Power Point, or similar method. This can be updated by the Green Team or school members as events/actions/training occur over the two year process. [For electronic templates and example applications](#) visit the Green School Application Page on the MAEOE website.
 4. Maryland Green School teachers and students **are required to input** their school's Sustainable Practices into our Metrics Collection Survey. This will allow MAEOE to quantify Maryland students' green achievements through data tracking (e.g. the number of trees planted, miles of streams cleaned, pounds of trash collected). This data can then be used to find inspiration in other school's projects and see the impact MD Green Schools have on the environment. It also includes a place to input your "Top Five" achievements. Please go to <https://www.surveymonkey.com/r/MetricsMDGS2016> to input your data.
 5. FieldScope- **(Optional)**, FieldScope is a user-friendly online mapping tool developed by National Geographic Society. Maryland Green School and Centers can input data for their school or center. Please go to <http://sustainableschools.fieldscope.org> to upload your data. For more information go to <http://maeoe.org/fieldscope/>. (Training videos are available). This is not required for the application however, if you as a teacher want to utilize the program, feel free to do so.
 6. Consider applying for joint certification with Eco-Schools USA. The MAEOE/Eco-Schools partnership provides new resources and opportunities, and increases visibility for your school and students. The partnership provides national and international networking opportunities and resources to support your school and curricula greening efforts in Maryland. [Click here for more information about the partnership and what your school can gain from participating.](#)
 7. File your Intent to Apply and pay the fee by **December 18, 2015**. The fee of \$75 must be paid to MAEOE either by check or credit card. See page 14 for more details about filing the intent to apply.

For Frequently Asked Questions about the Application please go to <http://maeoe.org/frequently-asked-questions/>

For specific inquiries, contact your local Green Center or email greenschools@maeoe.org

Application Checklist

Complete and submit the following **required** application materials.

- ___ **Intent to Apply Fee:** Fee of \$75 must be paid to MAEOE by **December 18, 2015**. See page 13 for more details about filing the intent to apply.

- ___ **Cover Sheet:** must have an **original** signature by the principal. Please submit this separately from your application (either by email or mail). You are welcome to also embed it within your application. You will find this on the [Green Schools Application Page](#).

- ___ **Brief summary:** This is a one page report describing your school's green culture and significant changes that the school has made. Please submit **no more than one page**. Please submit this within the main application.

- ___ **Metrics Collection:** Enter your Sustainable Practices data into Survey Monkey. The **required top five accomplishments is now included in the metrics collection**. Please include one sentence for each of the accomplishments. Please submit **no more than one sentence for each bullet point**. These will be read at the Youth Summit Awards Ceremony. **Survey Monkey link here:** <https://www.surveymonkey.com/r/MetricsMDGS2016>.

- ___ **Documented Application Objectives:** your application will be evaluated using the rubric on the information AND documentation that your school provides for each objective. Documentation must be fully explained with appropriate captions. Examples of how you can meet the objectives are found on pages 3-11. Past applications and the rubric can be found on the [Green Schools Application page](#) at www.maeoe.org. Applications are due no later than **March 17, 2016**.

Completed Green School Application Objectives Checklist

Objective 1: Systemic Sustainability

- ___ 1.1 Curriculum and Instruction: Environmental Issue Instruction
- ___ 1.2 Professional Development
 - ___ 1.2.1 Full Staff Awareness
 - ___ 1.2.2 Ten Percent (10%) of Teaching Staff Professional Development
 - ___ 1.2.3 Additional Professional Development (Optional)
- ___ 1.3 School-Wide Environmental Behavior Changes (Optional)
- ___ 1.4 Celebration

Objective 2: Student-driven Sustainability Practices (Required: 4 of 7)

- ___ 2.1 Water Conservation/Pollution Prevention
- ___ 2.2 Energy Conservation
- ___ 2.3 Solid Waste Reduction
- ___ 2.4 Habitat Restoration
- ___ 2.5 Structures for Environmental Learning
- ___ 2.6 Responsible Transportation
- ___ 2.7 Healthy School Environment

Objective 3: Community Partnerships, Awards, and Special Recognition

- ___ 3.1 Community Partnerships
- ___ 3.2 Awards and Special Recognition (Optional)

Objective 1: Systemic Sustainability
(Curriculum and Instruction, School-Wide Behavior Changes, Professional Development and Celebration)

1.1 Curriculum and Instruction: Environmental Issue Instruction

Demonstrate you are using hands-on, real-world instruction on environmental issues. (see [MSDE Environmental Literacy Standards](#)). *We are supporting the integration of environmental literacy into school curriculum. We encourage you to connect environmental topics to NGSS, C3, Common Core and STEAM. This can be done by using examples found in your curriculum and documenting them in your application. [See examples and resources here.](#)*

You MAY use the [Connections to NGSS, STEM, or MSDE Environmental Literacy Standards chart](#) to fulfill the Information component of this section of the application. If you choose to do so, you still must supply documentation for each activity.

Did you know that you and your students can take action to address Climate Change and other pressing environmental issues including decreasing biodiversity, nitrogen cycle, aquifer depletion, endangered species, habitat loss and more? For example, planting trees not only provides shade, habitat, and oxygen, but trees also take carbon dioxide from the atmosphere and store it for decades. You can find standards-linked lessons about climate change, workshops and more [here](#).

Required: At least one example of this type of instruction per grade level for elementary and middle school; OR in at least four subjects for high school (can be non-science subjects, but can also be multiple science subjects, for example chemistry and biology) with a brief explanation of how students are using the environment as a context for learning. Document each example. Student Involvement can be outdoor and/or classroom environmental investigations.

Acceptable: Elementary/MS -instruction in all grades (all students receive environmental instruction)
HS- Instruction in at least 4 subject areas (all students receive environmental instruction)

Good: ES/MS: all grades, multiple subjects
HS: more than 4 subject areas

Excellent: ES/MS: all grades, all subjects
HS: all subject areas

Examples:

- Cross curricular activities that investigate the environment (e.g. Calculate area of solar panels in math, research the history of energy use in social studies, etc.) For more ideas please click [here](#).
- Using schoolyard, community, or field trip locations for outdoor education integrated into the curriculum
- Incorporating outdoors in artwork or music education
- Activities that connect pressing environmental topics such as climate change, decreasing biodiversity, nitrogen cycle and other issues within your curriculum. For example students learn that planting trees not only provides shade, habitat, and oxygen, but trees also take carbon dioxide from the atmosphere and store it for decades.

Ideas for Documentation: (NOTE: ALL documentation should be captioned with text explaining the grade level/subject area and any necessary explanation of the activity!)

- student work
- photos of students engaged in environmental learning
- student reflections

1.2 Professional Development

Demonstrate the staff is actively preparing to support your school's environmental literacy plan to help fulfill the state's [environmental literacy requirement](#)

- Required:**
- 1.2.1 All staff is aware of the Green School application process
 - 1.2.2 At least 10% of teachers have participated in EE PD
 - 1.2.3 Additional Professional Development (Optional)

*****Information should include dates, length of time, teachers' names, grade levels, and numbers of teachers. *****

Examples:

1.2.1 All staff is aware of the Green School application process

- o Staff meeting agenda includes Green School application update
- o Whole staff presentation on Maryland Green Schools Program provided by a Green Center/Green Leader
- o Collaborative lesson planning involving environmental/Green School components

1.2.2 At least 10% of teachers have participated in Environmental Education PD within the last 4 years.

NEW THIS YEAR- All schools (new AND recertifying) can use Professional Development from the past 4 years.

- o Staff member(s) attend(s) MAEOE conference
- o Staff attend environmental education workshops (e.g. Project WET, Chesapeake Classrooms, POW!, Master Naturalist, Project Learning Tree, Food, Land and People, Chesapeake Bay Foundation Professional Development, etc). Find more examples on the MAEOE Professional Development Calendar or talk to your local Green Center
- o Lesson modeling in classrooms from Green Centers or other partners
- o Environmental speakers presenting at staff meetings or workshops (NOT at school wide assemblies with students) ****Consider speaking with your Green Leader to see if this is a possibility for them****
- o Environmental Education focused webinars
- o Climate change solutions (eg. MADE CLEAR Academy)

1.2.3 Additional Professional Development (Optional)- Received earlier than 4 years ago. **NOTE:** These Additional Professional Development activities do count in the 10% requirement in 1.2.2

- o Bachelor's or other degrees in Environmental Science
- o Environmental education professional development course (e.g. Project WET, Chesapeake Classrooms, POW!, Master Naturalist, Project Learning Tree, Food, Land and People, Chesapeake Bay Foundation Professional Development, etc)
- o MAEOE Environmental Educator Certification

Ideas for Documentation: (NOTE: ALL documentation should be captioned with the specific names of staff involved, dates, and any necessary explanation of the activity!)

- agendas
- certificates of completion or participation
- email confirmations/registrations
- sign-in sheets
- dated, signed notes taken at a PD

1.3 School-Wide Environmental Behavior Changes

Demonstrate the steps your school has taken to make your school green.

Optional (Not Required): However, if you have examples of non-student driven sustainability practices, they can be included here. If there is student involvement, then the actions should be documented under student-driven sustainability practices in Objective 2.

Examples:

- Staff using electronic newsletters and implementing policies to reduce paper use (i.e., double-sided copying)
- Task lamps, day lighting (use of natural light), de-lamping (purposeful removal of ½ of light bulbs), or energy saver mode on electronics used by all teachers to save energy
- Installation of energy-efficient lighting or motion-sensitive lights
- Integrated pest management
- Staff carpooling or public transportation incentive program
- Reduction of impervious surfaces (blacktop, concrete) in the schoolyard
- Teachers using green cleaners in classrooms
- Installation of solar panels and/or green roof

Ideas for Documentation:

- photos of the practices being implemented (*i.e.: photos of staff using daylighting*)
- policies
- blueprints
- email or other correspondence

1.4 Celebration

Demonstrate how your school community celebrates being green.

Required: At least one school-wide, annual event with a brief description of the celebration, number of students involved, date and **labeled** documentation need to be included.

Examples:

- The whole school celebrates International Walk to School Day each October
- The whole school celebrates Earth Day each April (classes can celebrate separately as long as they all celebrate)
- The whole school turns out the lights each March for Earth Hour
- A green school bulletin board is used to highlight green school activities (only acceptable in conjunction with other celebratory activities)
- Students participate in annual environmental poster contests (only acceptable in conjunction with other celebratory activities)
- Morning announcements regularly focus on green topics (only acceptable in conjunction with other celebratory activities)
- USGBC Green Apple Day of Service <http://www.mygreenapple.org/>

Ideas for Documentation: (NOTE: ALL documentation should be captioned with the specific names of students involved, dates, and an explanation of the activity!)

- newspaper/newsletter articles
- photos of students participating in celebratory activities
- awards
- agendas/plans/programs for events
- email correspondence/ invitations

Objective 2: Student-driven Sustainability Practices

In this section, demonstrate that students are planning, implementing, and leading environmental practices. ****Reminder: Enter your data into Survey Monkey at <https://www.surveymonkey.com/r/MetricsMDGS2016>**

Required: Two actions from at least FOUR (4) of the following seven (7) categories as listed below. Reviewers expect to see maximum student involvement possible based on ability and age of students. Each activity should be documented. The documentation should include a few sentences describing the activity, grade level, number of students who participated, and date.

Ideas for Documentation:

- student work/reflections
- photos of students engaged in sustainability practices
 - photos of students designing a sustainability practice (e.g., drawing the design for an outdoor classroom that they later help build)
 - photos of students working to build a sustainability practice (e.g., installing a rain barrel, painting bird boxes, creating energy saving posters)
 - photos of students engaged in a sustainability practice activity (e.g., picking up litter, writing letters to administration or political representatives)
 - photos of students maintaining a sustainability practice (e.g., weeding and watering a habitat garden)
 - DO NOT USE: photos of students simply standing next to a sustainability practice (unless you also include photos of the students creating it and are just including it as the final product photo or culmination of the process) – the students need to be actively engaged. If the sustainability practice was built prior to the application timeframe, you need to show that students are actively maintaining, continuing, and/or extending the practice.
- student-created blueprints/plans
- newspaper/newsletter articles
- Correspondence planning a project (NOTE: if the correspondence is between adults, it MUST be accompanied by proof of student involvement in the project)

NOTE:

- MAEOE recommends that Schools choose ONLY four out of the seven categories below (2.1 – 2.7). Schools that try to complete more than four categories frequently impact their documentation quality so it's preferable to do four categories really well compared to more than four categories less well.
- Your application will be stronger if you include more than two actions/examples per chosen category!

Eco-Schools USA: In order to receive the Silver Award, a school must complete two of the Eco-School pathways. To receive the Bronze Award, a school needs to complete one pathway.

Eco-Schools pathways align with the MAEOE Sustainable Practices. Please go to <http://maeoe.org/eco-schools-usa/> for more information.

2.1. Water Conservation/Pollution Prevention

Required: Adequate information and documentation of students performing at least two activities, examples are listed below. Each student driven example of Sustainable Practices

needs to include a few sentences describing the activity, grade level, and number of students who participated and approximate date. Each activity should include at least one piece of **labeled** documentation. Photo documentation is strongly encouraged.

Examples:

- Students plant rain gardens or conservation landscaping
- Students install and use rain barrels
- Students create and hang signage near school sinks and water fountains to encourage water conservation
- Students remove litter from schoolyards, local parks, and streams with the activity focused on removing that litter before it reaches the waterways (stream restoration)
- Students conduct erosion-control projects such as installing riparian buffer zones and planting trees (stream restoration)
- Students stencil storm drains to prevent polluted water from reaching the streams
- Students plan and create no-mow zones with identifying signage (so it will not be mowed accidentally)
- Students create hydroponic or aquaponic gardening systems

2.2. Energy Conservation

Required: Adequate information and documentation of students performing at least two activities, examples are listed below. Each student driven example of Sustainable Practices needs to include a few sentences describing the activity, grade level, and number of students who participated and approximate date. Each activity should include at least one piece of **labeled** documentation. Photo documentation is strongly encouraged.

Eco-Schools USA: If your school is also applying to be an Eco-School, you must complete this category to receive the Eco-Flag Award

Examples:

- Students label the light switches throughout the school with signs or switch-plates encouraging energy conservation and reducing our impact on climate change
- Students implement the results of their energy audits or encourage decision-makers to implement actions based on their data collection
- Students perform classroom jobs to save energy, such as turning off lights & computers or closing the blinds (documentation could include a list of jobs posted in the classroom)
- Student group forms an “energy patrol” and issues “energy stars” to classrooms that turnoff lights or electronics
- Students plant trees to shade the building
- Students install energy-efficient lighting in computer labs or elsewhere in school
- Students create and read Energy Savings Tips on morning announcements
- Students write to their government representatives asking for renewable energy alternatives

2.3. Solid Waste Reduction

Required: Adequate information and documentation of students performing at least two activities, examples are listed below. Each student driven example of Sustainable Practices needs to include a few sentences describing the activity, grade level, and number of students who participated and approximate date. Each activity should include at least one piece of **labeled** documentation. Photo documentation is strongly encouraged.

Examples:

- Student Green teams regularly monitor, track, and/or manage the school recycling bins
- Students participate in no-waste lunches
- Students organize recycling drives for ink cartridges, cell phones, batteries, etc.

- Students participate in up-cycling programs such as Terracycle
- Students create labels for recycling stations
- Students create posters to remind each classroom what to recycle
- Students collect compostable waste from the lunchroom
- Students monitor and maintain an outdoor compost bin or an indoor vermicomposting (worm compost) bin
- Students repurposed used materials into art projects
- Students create their own recycled paper
- Students advocate to hand in homework electronically or communicate via classroom blogs rather than with paper
- Students run a reusable water bottle campaign, encouraging other students to use water fountains and reusable water bottles instead of store bought plastic bottles
- Students create and/or run a school ReStore for unused school supplies

2.4. Habitat Restoration

Required: Adequate information and documentation of students performing at least two activities, examples are listed below. Each student driven example of Sustainable Practices needs to include a few sentences describing the activity, grade level, and number of students who participated and approximate date. Each activity should include at least one piece of **labeled** documentation. Photo documentation is strongly encouraged.

Examples:

- Students plant or tend a native plant garden in schoolyard (e.g. native plant butterfly, pollinator gardens)
- Students plant native trees or native bay grasses
- Students install/monitor bird, bat, or butterfly boxes
- Students remove invasive plants from schoolyards or neighboring parks
- Students construct oyster reef habitat balls
- Students regularly monitor and care for a rotting log or brush pile decomposer habitat
- Students build and monitor insect hotels
- Students create and monitor a bird habitat area with food, shelter, and water sources
- Students maintain and use schoolyard habitat

2.5. Structures for Environmental Learning

Required: Adequate information and documentation of students performing at least two activities, examples are listed below. Each student driven example of Sustainable Practices needs to include a few sentences describing the activity, grade level, and number of students who participated and approximate date. Each activity should include at least one piece of **labeled** documentation. Photo documentation is strongly encouraged.

Examples:

- Students regularly work outside in an outdoor classroom (can be fixed or movable outdoor classroom)
- Students grow food in gardens at school (salad tables, raised bed gardens, in-ground gardens, etc.)
- Students advocate for green building infrastructure resources at their school, such as solar panels and green roofs
- Students create outdoor artwork for schoolyard/outdoor classrooms
- Students build and use a nature trail around their schoolyard
- Students post interpretative signage on interesting environmental features around the schoolyard (i.e.: erosion, decay, etc.)
- Students identify native trees or plants in the schoolyard and create a labeled identification trail or scavenger hunt

2.6. Responsible Transportation

Required: Adequate information and documentation of students performing at least two activities, examples are listed below. Each student driven example of Sustainable Practices needs to include a few sentences describing the activity, grade level, and number of students who participated and approximate date. Each activity should include at least one piece of **labeled** documentation. Photo documentation is strongly encouraged.

Examples:

- Students survey, analyze and implement carbon reducing actions to improve school transportation issues
- Students create a no-idling zone by posting signage and handing out fliers
- Students run a bike safety program
- Students participate in Safe Routes to School activities to advocate for safe routes
- Students routinely go on walking field trips to reduce their carbon footprint and get to know local ecosystems, emphasizing the effects on climate change
- Students conduct tire pressure/oil leak checks on faculty vehicles and inform vehicle owners of results (improper tire pressure leads to greater fuel consumption)
- Students create carpool groups
- Students advocate for hybrid parking and/or carpool parking

2.7. Healthy School Environment

Does your school do two or more activities that get students active outside or promote/uses sustainable food choices?

Required: Adequate information and documentation of students performing at least two activities, examples are listed below. Each student driven example of Sustainable Practices needs to include a few sentences describing the activity, grade level, and number of students who participated and approximate date. Each activity should include at least one piece of **labeled** documentation. Photo documentation is strongly encouraged.

Examples:

- Students make and use non-toxic or green cleaning products for classrooms
- Students grow and donate and/or eat healthy food in school gardens
- Students grow indoor plants to enhance air quality
- Students organize an outdoor running or other health club that **utilizes the school grounds and encourages the students to spend time outdoors.**
- Students create a poster campaign to encourage healthy eating choices while promoting the school's garden and the importance of local, sustainable and organic farming (agriculture).
- Students host a "Recycling Olympics" or "Green Run" to encourage exercise and activity while incorporating environmental action.
- Students organize a community clean-up

Objective 3: Community Partnerships, Awards and Special Recognition

3.1. Community Partnerships

Demonstrate who is collaborating with your school on environmental education.

Required: One sustained partnership where the partner is active in the school **AND** one sustained partnership where the school is active in the community (Can be the same partner organization or a different one). Photo documentation is strongly encouraged.

Possible partners:

- Local Green Centers/Green Leaders
- Alice Ferguson Foundation *Trash Free Schools*

- County agencies (e.g. local USDA extension service, soil conservation district, health department, library, public safety [police and fire department])
- State agencies (e.g. DNR, MDE, MSDE, Forestry Board)
- Federal agencies (e.g. NOAA, EPA, USDA)
- Local businesses (e.g. Lowes or Home Depot)
- Local garden clubs (e.g. Master Gardeners, Master Naturalists, 4-H)
- Local parks or Maryland-National Capital Park and Planning Commission
- Non-profits (e.g. Chesapeake Bay Trust, Chesapeake Bay Foundation, Girl/Boy Scouts)
- Colleges and universities
- Energy companies, waste management companies or other

School Active in Community Examples:

- Students do environmental service projects off-site (e.g. stream clean-up, storm drain stenciling, invasive species removal, etc)
- Used-Clothing Drive, with emphasis on reusing as conservation
- “Terrapins in the Classroom” project, release terrapins in the Bay (Other examples of similar programs include oysters, trout, monarchs and more)
- Fundraiser at the school to support community environmental projects
- Students run a letter writing campaign to political representatives
- Green Festival inviting the community to learn from students’ work

Community Active in the School Examples:

- Green Leader comes into the School to help with activities and/or the application
- Partner comes in to help set up an environmental project (eg. bird boxes, rain gardens, edible gardens, outdoor classroom)
- Receive a grant for a School Environmental Project
- Environmental speaker comes to do an environmental education assembly
- Green Festival inviting the community to exhibit and present

Ideas for Documentation:

- photos of students and community partners working together on an environmental education or sustainability practice activity
- student reflections about the activity
- newspaper/newsletter articles
- email or other correspondence with the partner (should include dates, names and more)

3.2. Awards and Special Recognition (Optional)

Optional (Not Required): Information here enhances your application. If your school or students have received awards or special recognition, include a few sentences describing the activity, grade level, number of students who participated, and date. Each activity should include at least one piece of documentation.

Examples:

- County awards (e.g. “A” grade on recycling from the county)
- Measurable energy savings awards
- National awards (e.g. Green Ribbon, Blue Ribbon, Eco-Schools, Healthy School Award)
- Specific Students recognized for Green efforts through scholarships, conferences, science fairs and more

Ideas for Documentation:

- student work/reflections
- photos of the award or of a special recognition event
- newspaper/newsletter articles
- correspondence
- copy of certificate/awards

Guide to Maryland Green School Documentation

The key to remember is that you must PROVE EVERYTHING that you say in your application.

If you say something, but do not include documentation (proof) of it, that information will not be considered towards receiving your certification.

DO:	DON'T:
<ul style="list-style-type: none"> o Make sure that everything you say is backed up by documentation! o Caption every piece of documentation: <ul style="list-style-type: none"> ▪ date ▪ number of people involved (specific names of staff required for PD) ▪ description of activity o Use strong documentation: <ul style="list-style-type: none"> ▪ photos ▪ student work/reflections ▪ dated correspondence (with student involvement proven if necessary) ▪ newspaper/newsletter articles reporting on a completed activity ▪ certificates/awards ▪ (for PD): agendas with sign-in sheets ▪ (for PD): certificates of completion/participation ▪ (for PD): email registrations/confirmations of attendance o Include students in gathering documentation and organizing it in your application o Enter Objective 2 Data into Survey Monkey. For more information on this please see page 13. 	<ul style="list-style-type: none"> o Include any information without documenting it o Include uncaptioned documentation o Include lesson plans for an objective without other documentation (ONLY include if accompanied by other documentation that proves the activity actually happened and shows how the students were involved/responded to the activity) o Include documentation that does not prove an activity happened. It does not strengthen the application (and may, in fact, weaken it). Examples of non-documentation that should not be included: <ul style="list-style-type: none"> ▪ images copied off of the internet (instead, use photos of your students at work) ▪ descriptions of programs copied off of the internet (instead, use your students' photos or reflections about the program) ▪ flyers or emails advertising PD's (instead, use specific proof that a specific staff member attended the PD) ▪ curriculum created by the school system and used by the whole system (it doesn't prove your school is taking special steps to be green – except when enhancing Objective 1.2)

IMPORTANT FILING INFORMATION AND DATES FOR 2015/16

Maryland Green School Application Dates:

- Application fee of \$75 must be paid to MAEOE by **December 18, 2015**. Schools that applied in Spring 2015 and are resubmitting in the 2015/2016 school year will not be required to file an additional application fee. However, please contact greenschools@maeoe.org to confirm your fee status and intent to apply.
- On-line applications are preferred. See the MAEOE website for [examples](#) and [templates](#).
- **Send all electronic applications to applications@maeoe.org. The Application's Cover Sheet should be sent separate. The Application's One Page Summary should also be sent in with the main application.** Please send to applications@maeoe.org or MAEOE, 7761 Waterloo Rd, Jessup, MD 20794.
- Maryland Green School teachers and students **are required to input** their school's Sustainable Practices into our **Metrics Collection Survey**. It also includes a place to input your "Top Five" achievements. Please go to <https://www.surveymonkey.com/r/MetricsMDGS2016> to input your data.
- **Due Date:** Electronic applications and hand-delivered applications are due to MAEOE by **March 17, 2016**. PowerPoint applications (saved on discs or USB Drives) that are being mailed to MAEOE must be postmarked by **March 15, 2016**. Applications received after March 17, 2016 and mailed applications postmarked after March 15, 2016, are not guaranteed review.
- Please contact your local Green Center or Green Leader with application questions.
- You will receive a confirmation email by **March 25, 2016**. Because of the number of applications we receive on the due date you are not guaranteed a confirmation until March 25. If you do not receive this confirmation, please send an email to applications@maeoe.org
- **SAVE THE DATE!!!!** Maryland Green School Youth Summit, Friday, **May 13, 2016**, 9am – 2pm. Information about previous Maryland Green School Youth Summits can be found at www.maeoe.org/youth-summit.

Thank you for your interest in the Maryland Green School award program, a sustainable green schools program that demonstrates your schools progress with the Maryland Environmental Literacy requirement as set forth in COMAR 13A.04.17.
