

Student Sheet – Rethink, Reduce, Reuse, & Recycle

Objectives

Your assignment is to create a plan for your school that reduces trash by at least 50%

Your Plan

1. Think of all of the things that are used at your school. It is important to think of items used and discarded everyday, such as paper, and to think of the big items, such as furniture and computers.
2. For each category of trash, fill in the table below, explaining:
 - What is done with the trash in that category now;
 - Why it is discarded;
 - What your new plan is for the discarded trash; and
 - How would this get done? Who would do it?

Type of Trash	Why It Is Discarded	What Happens to It Now	Your new plan for it is...	How will this happen? Who will do it?
